

Academic Service Learning Programs

Purposeful. Meaningful. 34 Years of Success.

Service. Seriously. Our Promise, Your Value:

We help students transform their good intentions, curiosity, and adventurous spirit into genuine, useful assistance, and a rewarding volunteer abroad experience. We ensure:

- **Sustainability:** Students, as middle links in a chain, continue work by teams before and after them.
- **Authenticity:** The continuity from team to team every year places students in the day-to-day life of the host community.
- **Equal Partnership:** Working alongside local people, students gain deep insights and mutual respect.
- **World Citizenship:** Students are engaged in true service-learning, the foundation of responsible international leadership.

What Does This Mean For You and Your Students?

The C-O-N-N-E-C-T model balances the impact of volunteering between both those who serve and those who are served. Global Volunteers optimizes students' learning opportunities, while providing the most effective services to our community partners.

Your students can help children reach their full potential around the world.

Work with families to support healthy growth

Teach conversational English

Help children with reading and math

Provide care for at-risk children

Support community led labor projects

Help improve nutrition and end hunger

Engage Students' Academic Knowledge!

Who's needed? Students in health care, child development, social work, nutrition, education, horticulture, and related fields to work with local professionals and other volunteers. They'll help facilitate workshops, extend basic healthcare services, tutor special-needs students, and support teachers who are developing model classroom discipline plans. Enhance your students' academic growth by helping us provide long term development assistance worldwide.
